This board is for the discussion of news, world events, political issues, and other related topics.

Off-topic and /b/-tier threads will be deleted (and possibly earn you a ban, if you persist). Unless they are quality, well thought out, well written posts, the following are examples of off-topic and/or /b/-tier threads:

>Red pill me on X. (with no extra content or input of your own)
>Are X white?
>Is X degeneracy?
>How come X girls love Y guys so much?
>If X is true, then how come Y? Checkmate Z.

The variety of threads allowed here are very flexible and we believe in freedom of speech, but we expect a high level of discourse befitting of the board. Attempts to disrupt the board will not be tolerated, nor will calls to disrupt other boards and sites.

Extremely lax moderation

Almost anything goes

Anonymity & Ephemerality

Actually all posts deleted after a week

Challenges of Measuring 4chan (and other fringe communities)

1. Not your typical social network (anonymous/ephemeral)
2. Their actions not limited to 4chan, need to look at other platforms to measure their impact
3. Knowing what they're talking about is not easy
4. You might get raided, doxxed, etc.
5. Protecting your students

Besides raids… we have studied a bunch of stuff!

(and in fact not only 4chan but also Reddit and Gab)

1. Influence on misinformation
2. Discussions (and abuse) of genetic testing
3. Weaponization of memes

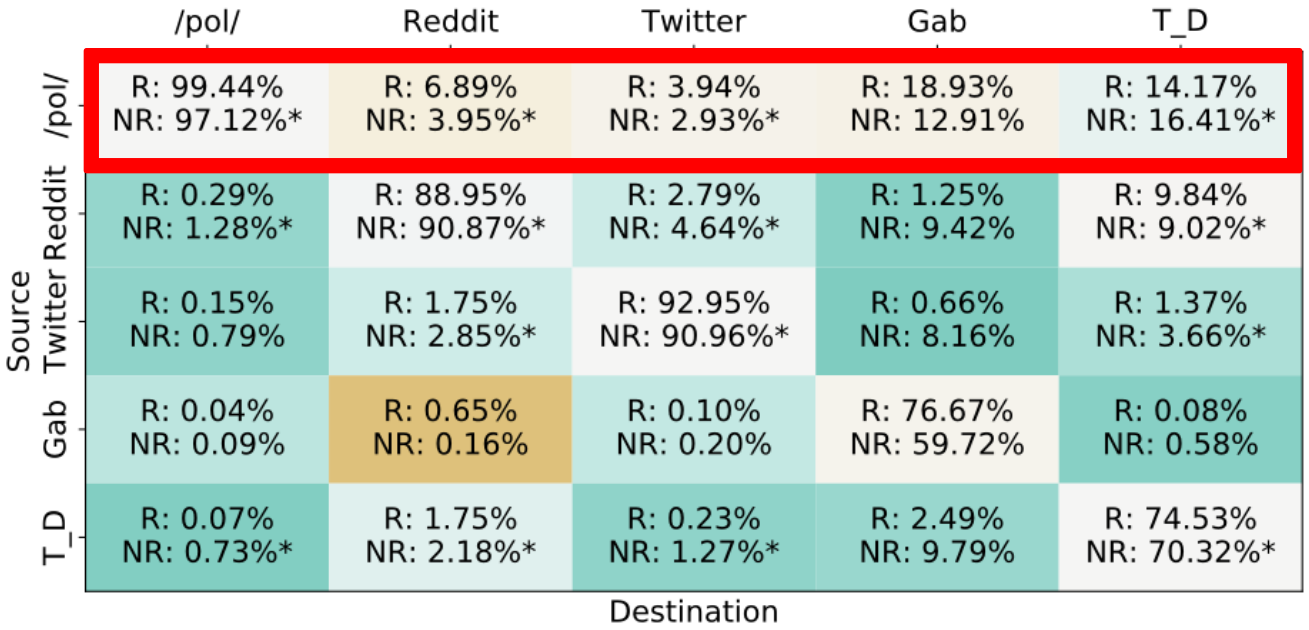
Table 6: Top ten subreddits for all memes, racism-related memes, and politics-related memes.

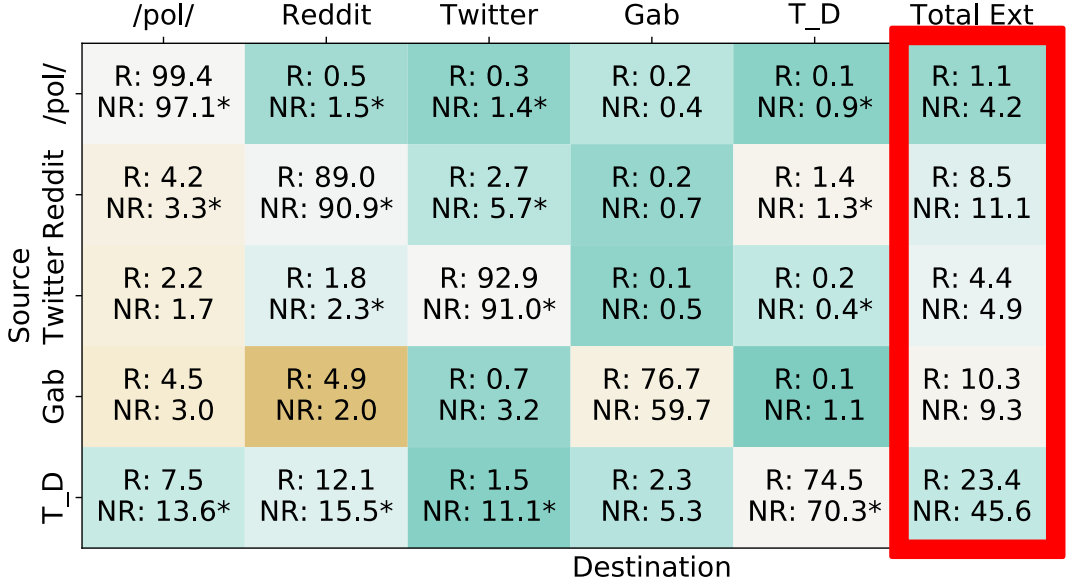
Communities' influence (racist memes)

/pol/ is most influential in terms of spreading racist memes



Communities' efficiency (racist memes)

If we look at the influence normalized to the number of memes posted, the The_Donald is most *efficient* in terms of disseminating memes



Looking ahead

- New models for social networks, like Gab and Mastodon, prompt new and important challenges in this space
- In particular, decentralized infrastructures are harder to study and monitor… ongoing work:
  1. Analyzing hate in decentralized social networks like Mastodon
  2. Designing decentralized algorithms that can aggregate and weight info for multiple instances to better identify fake news

Thank you!

When U.N. sends its Pepes, they're not sending their best. They're not sending Kek, they're not sending rares. They're sending Pepes that have lots of copies, and they're bringing those copies with us. They're bringing tumblr. They're bringing facebook. They're common. And some, I assume, are rare Pepes.

>Oh wait... Two factors that may have an influence on such interactions are cultural differences between individuals in highly multicultural workplaces, and the layout and physical spaces of the workplace itself. In this work, we investigate how these two factors may facilitate or hinder inter-group interactions in the workplace.

Emiliano De Cristofaro
>globalist
>Italian national Dr Emiliano De Cristofaro, a senior lecturer in computer science at University College London, criticised the comments.
>"Quite frankly. I am very upset. It inherently discriminates against a portion of the population living in this country, making us feel like second-class individuals. Nobody should be used as a negotiating chip, let alone people who are working hard, paying taxes and strongly contributing to the country," he said.
>"I also fear that statements like this will further encourage hate crime, discrimination and racism against EU citizens."

>Recent or forthcoming papers: "What Happens After You Are Pwnd: Understanding The Use Of Leaked Webmail Credentials In The Wild."
>In that paper: "We leaked 100 honey accounts on paste sites, underground forums, and virtual machines infected with malware, and provided detailed statistics of the activity of cybercriminals on the accounts, together with a taxonomy of the criminals. Our findings help the research community to get a better understanding of the ecosystem of stolen online accounts, and potentially help researchers to develop better detection systems against this malicious activity."
